Profile

19-year old programmer and general development enthusiast, which discovered in the middle of high school, coding is his future. He has gone "all in" into it, neglecting school commitments and other areas of life. Therefore, he decided to learn programming by himself.

Hobbies

Besides programming, which is my main interest. I'm also interested into the world of finance and development in general. I love reading books, that I acquire not only financial, but also knowledge about psychology from. Speaking about programming, I learned recently the ThreeJS library. How to use it etc. and I felt in love with threeJS library, which became my obsession. I intend to explore it and build a enormous project with usage of it.

Education

Student, II Secondary School in Szczecin, Szczecin

SEPTEMBER 2020 — APRIL 2024

I was an regular student, when it comes to marks and so forth. My only aim was to pass from class to another without any issues. Technically it worked out, however one time was special due to the classification exam I had to take part in.

Projects

BookFreak (Mobile), Szczecin

FEBRUARY 2023 — PRESENT

A Project, which has been created from love towards reading books. I love to gain an relevant knowledge about buisness' work, investments and all other topics related to finances, but also psychology. Thus, as my first own react project I created BookFreak. Sadly, the work on this project has been postponed multiple times, because of school issues and private complexities and may not look as I would have worked on it the entered amount of time.

Because on January 2024, I also created an app for mobiles, where I struggled with issues connected with libraries attached to my project.

I intend to work on this project in the future, because I see the potential in it.

Twitter Clone, Szczecin

MARCH 2024 — MARCH 2024

This Project has been created by means of an tutorial, which taught me a new tool, which was Prisma. I like this ORM, because it simplifies the work with backend. I created the project with a pleasure and it propeled me to create the next project which was Spotify Clone.

Spotify Clone, Szczecin

MARCH 2024 — APRIL 2024

Because of an increasing doubt in my UI-building skills, I decided to recreate an Spotify App with small changes, like for instance change in the sidebar. This project propeled me and has proven my skill in terms of building UI. Besides UI, I recreated the most essential functionalities Spotify offers.
